

# Irem Beyzanur Ofluoglu

## Frontend Developer

Skilled Frontend Developer with 2 years of experience, dedicated to crafting engaging web experiences. Proficient in HTML, CSS, JavaScript, React and Next.js I specialize in building dynamic and user-friendly applications. I prioritize delivering high-quality results and thrive in team settings, adapting seamlessly to new technologies. A quick learner with strong problem-solving abilities, I'm committed to staying updated on industry trends to ensure optimal performance.

## Experience

### Aug-Jan (2023-2024)

E-Commerce Project | Intern | Remote

#### Frontend Developer

- Engaged as a Frontend Developer in a collaborative project, contributing to the codebase written in the JavaScript programming language.
- Employed Agile Scrum, a Software Development Life Cycle (SDLC) methodology, participating in regular Daily Scrums to assign and track tasks, fostering effective team communication.
- Actively utilized GitHub for version control, ensuring seamless collaboration among team members. Implemented the project using Vite.js, a modern build tool, during the development phase.
- Leveraged Redux Toolkit to establish a centralized state management structure, enhancing the efficiency of data flow within the application.
- Developed codebase using the React component architecture, promoting modular and maintainable code.
- Integrated various libraries to enhance project functionality, including Bootstrap, Material UI, React Router Dom, React Data Table, Moment, Formik, Yup, and Swiper.
- Demonstrated proficiency in creating responsive and dynamic user interfaces, adhering to industry best practices.

### Feb-Jun (2023)

Rent a Car Project | Intern | Remote

#### Frontend Developer

- Worked as a Frontend Developer on the Rent a Car Project, using Vite.js to kickstart the project and writing code in JavaScript.
- Organized code into React components and used React Router Dom to manage different pages smoothly.
- Participated in daily scrum meetings in accordance with Agile Scrum principles to foster collaboration and contribute to project advancement.
- Managed project versions efficiently using GitHub for collaboration among team members.
- Designed layouts to make the project visually appealing and structurally sound.
- Used Redux Toolkit to keep track of the project's state, making it easier to manage and scale.
- Incorporated various libraries like React Redux, Swiper, Yup, Formik, Bootstrap, and React Input Mask Encrypt-Storage to improve performance and reduce repetition in the code.

## Projects

### Clone of Microsoft Web Page

This project is a study in the field of responsive web design, implemented using HTML, CSS, and Bootstrap.

### Clone of Levi's Web Page

This project is a single-page application developed using HTML, CSS, and Bootstrap. Through these projects, I enhanced my expertise in the responsive design domain.

### QuikLearn

This project was developed using Vite.js, utilizing the JavaScript programming language. Data was organized as an array and object within a constants folder in the index.js file. Utilizing map loops, filtering, and destructuring methods, these data structures were incorporated into the components. Tailwind CSS was employed for responsive design. Additionally, Swiper, Count-Up, Material UI, Framer Motion, and Headless UI libraries were utilized in the development of this project. It's worth noting that the purpose of this project was to experiment with different libraries and frameworks.

### Maker's Mind

This freelance project, currently in the development stage, showcases my proactive approach in crafting innovative solutions. Leveraging Next.js, I've utilized cutting-edge technologies to build dynamic and responsive web applications. This website is dedicated to providing information about a range of activities, including intelligence games and robotics coding workshops.

## Education

2015-2020

**Karadeniz Technical University**

**Bachelor's Degree**

Academic Unit: Faculty Of

Theology Program/Department: Theology Pr.

## Skills

- HTML
- CSS
- JavaScript
- React
- Next.js
- Redux
- Bootstrap
- Tailwind
- RESTful API
- GraphQL
- Git
- SEO
- SASS
- SDLC
- Jira
- Responsive Web Design
- TypeScript

## Language

Turkish (Native)

English (B2)
